

HATICE KAVÇAKAR

Industrial Engineering Student

İzmir, Türkiye | +90 543 460 97 41 | h.haticekavcakar@gmail.com | linkedin.com/in/hatice-kavcakar-7408322b6 | hhaticekavcakar.github.io

PROFESSIONAL SUMMARY

Fourth-year Industrial Engineering student with hands-on manufacturing experience in production planning, quality control and cost analysis. Skilled in Python, Excel, Arena Simulation and optimization tools, with academic project experience in discrete-event simulation, process optimization and data-driven decision making.

EDUCATION

Bachelor of Science in Industrial Engineering

Yaşar University, İzmir, Türkiye

2022 - Present | Expected Graduation: 2027 | GPA: 3.19/4.00

EXPERIENCE

Industrial Engineering Intern

GİMAS Girgin Machinery, İzmir, Türkiye | June 2026

- Analyzed nonconformity, rework and scrap-cost data using Pareto analysis to identify major sources of quality-related costs.
- Monitored production and quality KPIs in Excel to support process improvement initiatives.
- Gained cross-functional exposure to production planning, quality control, non-destructive testing (NDT), warehouse operations and purchasing across welding, machining and assembly processes.

ACADEMIC PROJECTS

Regional Airport Passenger Flow Simulation | IE 3511 Systems Simulation

- Developed a discrete-event simulation of an airport departure system in Arena, covering check-in, baggage drop, security screening and gate access.
- Evaluated six improvement scenarios under a fixed investment budget and identified strategies that substantially reduced the simulated missed-flight rate.

Converting Process Analysis and Optimization, Alkim Kağıt | IE 3524 Integrated Manufacturing Systems

- Analyzed the paper slitting process and built an Excel Solver linear programming model and a 2x2 Design of Experiments to evaluate cutting and sequencing strategies.
- Proposed configuration reduced trim loss from 4.50% to 4.20% and setup time from 105 to 45 minutes (57% reduction).

Tupperware Bankruptcy Analysis | IE 4563 Total Quality Management

- Analyzed Tupperware's decline through TQM principles, focusing on leadership, change management and customer orientation.

SKILLS

Technical Skills: Python, Microsoft Excel, Excel Solver, Arena Simulation, LINGO

Engineering Methods: Production Planning, Quality Control, Process Improvement, Pareto Analysis, KPI Tracking, Time Study, Discrete-Event Simulation, Scenario Analysis, Linear Programming, Design of Experiments, Total Quality Management

CERTIFICATIONS

Project Management | BTK Akademi
